Flexible cable chain for sliding doors

Smart and elegant solution for sliding doors when power is required on the movable door itself.

For example to a door interlock switch. Especially designed for double sliding doors locked in the centre, with or without an overhead rail, where a fixed post to attach a cabling is missing. A number of kits have been created depending on the system height, type of door and requested size of the opening. See list of all combinations and article no.

Available for every height (not 1400 mm). The limit of the cable diameter is set to 8 mm.

Note, in case of no continuing panel next to the door, the kit cause a reduction of the max. door opening, at least 182 mm.
