# Cylinder handle lock

Secure your machine guard doors with the Cylinder Handle Lock—compatible with Euro and US cylinders. Simple, reliable, and cost-effective, it provides controlled key access and a familiar locking feel, prioritizing safety without overengineering.

Engineered with simplicity and reliability in mind, the Cylinder Handle Lock is the essential locking mechanism for industrial and manufacturing environments.

## Key Features:

- ◊ **Versatile Compatibility:** Designed to work seamlessly with both Euro cylinders and US cylinder versions, ensuring adaptability for various global standards.
- ◊ **Focused on Functionality:** No unnecessary complexities—this lock offers the familiar, intuitive feel of opening and closing a door. It's a straightforward solution tailored for engineers who value practicality over overengineered options.
- ◊ **Enhanced Safety & Access Control:** Equipped with controlled key access, it ensures that only authorized personnel can operate your machine guard doors, providing an added layer of safety.
- ◊ **Cost-Efficient Safety:** Balancing safety and affordability, this lock delivers reliable performance at a fair price point.

Whether you're designing or upgrading your machine guard doors, the Cylinder Handle Lock is the trusted choice for technical engineers seeking a durable, efficient, and user-friendly safety solution.
